

Key Features

- High Stability
- Easy Installation and Maintenance
- 4 wire type
- Long operating range (9-35VDC)
- Twin LED for 360 degree visibility
- RS485 Interface to connect with IOT Gateway

Introduction

Fire & Smoke Sensor is from the reliable supplier based out of India. The product is field tested for a long time and very easy to install and simple maintainability. The device is dustproof, moist-proof and moth-proof. It is suitable for commercial and residential installations equally. The device is using RS485 interface to connect with IOT Gateway.

Specifications

Technical Specifications	
Input Voltage	9-35V DC
Static Current	500µA (replay N.O.)/12mA(relay N. C.)
Alarm Current	18mA(replay N.O.)/10mA(relay N. C.)
Alarm Indication	LED Display (Red)
Operating Temperature	-10°C to + 55°C
Sensitivity	0.5dB/m (±0.1dB/m)
Humidity	95% non-condensing
